These products allow the additional security of 10-32 mounting screws for your heavy lighting fixture, or ceiling fan. We have systems for metal and

plastics, for deep as well as shallow ceiling boxes.

U.S. Patent 6881900 others Pending

e Products Inc.

TM e Safety Through Simplicity

Our Vision

Is to provide, manufacturers, Contractors and homeowners that want to do-it-yourself products that meet one simple requirement, "Safety Through Simplicity"

Our Products

Have been created to quickly reinforce existing metal or plastic ceiling boxes that are easy to install, meet demanding engineering requirements and safety for you and your customers

Our Solution

Ceiling fans require a ceiling box that is rated for the load of a ceiling fan, all of the fan manufacturers stress this fact in their installation instructions. Until now there has not been an easy way to do this, our products install in less than two minutes for most installations without crawling thru the attic, tearing up the ceiling or replacing the ceiling box.

Don't Crawl around in the Attic, Rip Out your Ceiling or Replace your Electrical Box, Use
